

## Managers Report for July 18,2009

This month has been busy with jetting sewer lines and repairing several old clay tile lines that have been invaded with roots and broken.

We finally got confirmation that we are a class 2 operational plant at the new ponds and are in full compliance with the State Requirements. When we are ready to upgrade to a class 3 plant they will work with us and grant that as we request.

Tim Roberts passed the grade 1 operator exam easily and is studying for grade 2. Bob Konopka passed his operator in training course with a average test grade of 95% and is now a grade 1 operator.

Eric Allen is now an operator in training, This is great as everyone on the sewer Crew is now licensed with the Water Quality Board.

Tom Cannell General Manager
